OAC Meeting Block 2 2019-2020
Attending: Deb, Wolfgang and Ruben.
Note taker: Ruben.
Previous notes are finalised.

Course Evaluations
Pattern Recognition
Students complained about the lack of feedback for both projects.
The second project has been a bit more of a problem with respect to feedback and the deadlines. The teacher is aware to this problem and will look for a solution for next year.

Geometric Algorithms
Homework was hard but that was expected.
The great use of the adding own question options to the Caracal reviews by the teacher is noteworthy.

Concepts of Program Design
Students state that the communication could improve for both the assignments and the material for the exam.
The current naming of the course seems to create confusion about the content. It should be checked if a name change of the course is appropriate and needed.
No reaction from the teacher.
AP: Contact the teacher about giving a response to the review.

Advanced Graphics
The teacher could consider getting a TA.
Communication could have been better from the start although the teacher tried to correct this.
Some subject could have been introduced better but given that they were new this year this is to be expected.
The teacher is well aware of these problems and is looking for solutions.

Sound and Music Technology
Low number of reactions and the answers are very diverse. We cannot draw a general conclusion from this data.
Reaction of the teacher not visible.
AP: Contact the teacher about making it visible.
**General remarks:**

We notice again that students are complaining about overlapping subjects given in the lectures of different courses. This is something we saw in previous Caracal reviews. Up to a certain degree, this is unavoidable or in some cases even wanted. But if it happens too often it becomes a problem and the program directors should be notified of this.

We have written a reaction to the “Budget Kwaliteitsplannen 2021-2024 afgerond+opleidingen” and sent it to Frank van er Stappen.
